Further, the Village retains the right to remove said tower after said 120 day period and charge all costs and expenses of removal and restoration to the owner. If there are two or more uses of a single tower or antenna, then this provision shall apply only to the antenna that is taken out of service.

(g) **Co-location on Towers**

It is the purpose and intent of this ordinance to encourage and assist in co-location of antennas and towers wherever possible for the purpose of reducing visual blight and improving public safety from an overabundance of tower structures. To further that purpose and intent, the following regulations shall apply:

In the event that the Village Council agrees, pursuant to a Co-location Agreement, then the height restrictions in this ordinance applicable to towers may be extended to allow, as a matter of right, an additional twenty (20) feet of overall height for every additional co-location site provided on the proposed tower up to a maximum of sixty (60) additional feet in overall height. In order to qualify for the additional height, the owner must agree to execute a Co-location Agreement, in the form prescribed by the Village, which shall include at a minimum the following rights and responsibilities:

1) The owner of the land and the owner of the tower shall execute a Co-location Agreement with the Village permitting co-locator(s) (other telecommunication providers) to locate antennas on the tower.

2) The agreement shall provide that in consideration for the use of the tower, the owner of the tower shall be reimbursed for certain costs as identified below.

3) The tower owner shall receive, on a monthly basis, fifty (50%) percent of the remaining monthly payments on the land lease, if any, for the tower structure. (The co-locator shall negotiate with the land owner for his own land lease for the co-locator’s equipment cabinet or equipment building.) Said lease payments to begin on the first day of the month that the co-locator gains access to the tower structure. The owner of the tower shall provide the Village (at the time of building permit issuance for construction of the tower) with a copy of the land lease evidencing the monthly lease payment (separating out the rent reasonably attributable to the ground space leased for the equipment cabinet or equipment building, if the lease does not do so) of the leased premises and certify that it is a true and accurate copy of said lease.

4) The tower owner shall receive from the first co-locator fifty (50%) percent of the costs of construction of the tower, (excluding costs attributable to the tower owner’s equipment cabinet or equipment building and installation costs exclusively attributable to the tower owner’s equipment), in a lump sum, subject to the tower owner certifying said amount to the Village and the Village confirming the costs of construction.
5) In the event of a second and/or third co-locator on the same tower, the tower owner and any existing co-locator(s) shall receive from the second and/or third co-locator their proportionate share; i.e., the second co-locator will be responsible for one-third of the remaining monthly tower land lease payments and one-third of the tower construction costs; the third co-locator will be responsible for twenty-five (25%) percent of the remaining monthly tower land lease payments and twenty-five (25%) percent of the tower construction costs. Said lease payments and construction costs shall be distributed on a pro-rata basis so that the tower owner and each co-locator pays an equal proportionate share of tower land lease and tower construction costs. Total payments of all tower users shall at no time exceed one hundred (100%) percent of tower lease or tower construction costs. Subsequent co-locators shall make the pro-rata payments on the same basis as set forth above.

6) The owner of the land agrees to make available to co-locators, a comparably sized space at a comparable rental for the purposes of accommodating a co-locator and subsequent co-locators= electrical equipment.

7) Each party to the Co-location Agreement, its successor and assigns, shall maintain its equipment in good condition and repair, and shall remain responsible for all costs, expenses and liabilities of every kind whatsoever relating to the maintenance, repairs and replacements of its equipment on the real estate and on the tower.

8) The tower owner, in connection with its building permit, shall submit an engineering report from a licensed structural engineer certifying that the tower has been designed and shall be constructed to structurally and physically accommodate the maximum additional telecommunication equipment it is designed to handle. The tower owner shall not deny a co-locator access to its tower on the grounds that the co-locator=s antenna and equipment imposes greater structural and wind loading impacts on the tower unless it presents a certified written report to the Village from a licensed structural engineer certifying that the co-locator=s antenna and equipment cannot be supported by the tower.

9) The tower owner shall grant to co-locators access to the tower and to their respective antennas at all reasonable times to install said equipment and to maintain same.

10) In the event of a dispute between the land owner, tower owner and/or the co-locator, the losing party shall reimburse the Village its costs, expenses and attorneys fees in enforcing the terms of this Ordinance or the Co-location Agreement.

(h) Relief Alternatively Available Through Special Use

In the event the Village, the land owner and the tower owner do not agree to execute a Co-location agreement, then said owner(s) may proceed with a Special Use application to seek the additional height. (Ord.No.0-72A-98, §7.5/26/98)

Posts used specifically for supporting a fence may exceed the applicable height limit by a maximum of eight (8) inches, thus allowing for ornamental treatment. To accommodate potential drainage conflicts and fluctuations in grade, the Director of Community Services may allow portions of a fence to exceed the applicable height limit by a maximum of 6 inches.

(6) Replacement of existing fence. Any existing fence, as of the effective date of this ordinance, may be replaced in its current location without having to comply with any applicable setback requirements. This proof shall be submitted in a manner acceptable to the Director of Planning and Zoning.

(b) **Buffers.**

(1) Landscaped strip. Any portion of a manufacturing district which lies within two hundred (200) feet of any zoned residential land or any planned residential land use according to the village's comprehensive plan shall not be devoted to any use unless a fifty (50) foot wide landscaped strip has been installed along the boundary in common with residential land.

   a. Such planting strip shall be installed in accordance with plans prepared by a landscape architect.
   b. Such planting strip must be approved by the village board or such installation guaranteed by a bond suitable to the village board.

(2) Height standards. Except for chimneys, vents, flag poles or communication devices, no portion of any building or structure shall have a vertical dimension from ground level to its highest point greater than one-third \( \frac{1}{3} \) the distance from said portion of the building to any residential land.

(c) **Screening.** The following requirements shall apply to all businesses or firms in manufacturing districts.

Noise testing. Noise testing is to be accomplished at the property line of the noise emitting source, with an octave band analyzer manufactured according to standards prescribed by the American Standards Association.

Unmeasurable noises. Noises incapable of being measured, such as those of an irregular and intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

Vibration.

Any industrial operation or activity which shall cause at any time and at any point along the nearest adjacent lot line, earth borne vibration, (other than background vibrations produced by some source not under control of this ordinance, such as the operation of motor vehicles or other transportation facilities) in excess of the limits set forth in Column I is prohibited.

Any industrial operation or activity which shall cause at any time and at any point along a residential district boundary line, earth borne vibrations in excess of the limits set forth in Column II is prohibited.

Vibration shall be expressed as displacement in inches and shall be measured with a three-component measuring system approved by the administrator.

*Steady state--Vibrations, for the purpose of this ordinance which are continuous, or, if in discrete pulses are more frequent than one hundred (100) per minute. Impact vibration, that is discrete pulse which do not exceed one hundred (100) impulses per minute shall not cause in excess of twice the displacement stipulated.

Smoke and particulate matter. The emission of smoke or particulate matter in such manner or quantity as to endanger or to be detrimental to the public health, safety, comfort or welfare is prohibited.

Grading the density of smoke and particulate matter. For the purpose of grading the density of smoke, the Ringelmann Chart, published and used by the United States Bureau of Mines shall be employed.

Emission standards from concentrated sources.

The emission of more than twenty (20) smoke units per hour per stack is prohibited.

The emission of smoke or particulate matter shall not have a density in excess of Ringelmann No. 2.

For fire-cleaning purposes, each stack may emit up to thirty-five (35) smoke units once during any six-hour period. In this period, smoke of Ringelmann No. 3 will be permitted for no longer than four (4) minutes per period.
(3) Emission standards from all sources.
   a. The rate of emission or particulate matter from all sources within the boundaries of any lot shall not exceed a net figure of one pound per acre of lot area during any one hour, after deducting from the gross hourly emission per acre the correction factor set forth in the following table:

*Interpolate for intermediate values not shown in table.

b. Determination of the total net rate of emission of particulate matter within the boundaries of any lot shall be made as follows:
   i. Determine the maximum emission in pounds per hour from each source of emission and divide this figure by the number of acres of lot area—thereby obtaining the gross hourly rate of emission in pounds per acre.
   ii. From each gross hourly rate of emission derived in (i), above, deduct the correction factor (interpolating as required) for height of emission set forth in the table, thereby obtaining the net rate of emission in pounds per acre per hour from each source of emission.
   iii. Add together the individual net rates of emission derived in (ii) above, to obtain the total net rate of emission from all sources of emission with the boundaries of the lot. Such total shall not exceed one pound per acre of lot area during any one hour.

(g) Toxic and noxious matter. No use shall, for any period of time, emit into the atmosphere, store on site, or discharge across the boundaries of the lot wherein it is located, toxic or noxious matter in such concentrations as to be detrimental to, or endanger the public health, safety, comfort, or welfare or cause injury or damage to property or business.

(h) Odorous matter. No use shall, for any period of time, emit an odorous matter in such quantity as to be readily detectable at any point along lot lines or as to produce a public nuisance or hazard beyond lot line.

(i) [Reserved.]

(j) Glare and heat. No use or activity shall be permitted which causes glare or heat to be transmitted or reflected in such quantities as to be detrimental or harmful to the use of adjacent properties. Such exposed sources of light shall be shielded so as not to create a nuisance across along lot lines.
(k) **Fire and explosive hazards.**

(1) The storage, utilization, or manufacture of solid materials or products ranging from incombustible to moderate burning, as determined by the administrator, is permitted.

(2) The storage, utilization, or manufacture of solid materials or products ranging from free to active burning is permitted provided that said materials or products shall be stored, utilized or manufactured within completely enclosed buildings having incombustible exterior walls and protected throughout by an automatic fire extinguishing system.

(3) The storage, utilization, or manufacture of flammable liquids or materials* which produce flammable or explosive vapors or gases, shall be permitted in accordance with the following table—exclusive of storage of finished products in original sealed containers, which shall be unrestricted:

ARTICLE XIII. - PLANNED DEVELOPMENT DISTRICTS

13.01. Legislative intent.

Planned development districts are the means by which planned developments are established.

13.02. Purpose.

The purposes of planned development districts are as follows:

(a) To promote flexibility in the planning, design, and construction of development projects and to permit diversification in land uses and the location of structures, in accordance with an approved planned development that also protects adjacent land uses; (Ord. O-34-17, 4/3/17)

(b) To promote the effective use of land to facilitate a more economic arrangement of buildings, circulation systems, land uses and utilities;

(c) To preserve to the greatest extent possible the open space, landscape features and amenities and to utilize such features in a harmonious fashion;

(d) To combine and coordinate architectural styles, building forms and building relationships within the planned development;

(e) To insure a quality of design and construction, commensurate with other developments within the Village; and

(f) To provide developers reasonable assurance of approval before expenditure of complete design monies, while providing Village officials with assurance that the project will retain the character envisioned at the time of approval.

13.03. Standards.

(a) Standards for all planned developments. All planned developments shall comply with the following general standards.

(1) The planned development shall be designed, located and proposed to be operated so that the public health, safety and welfare will be protected.

(2) The planned development shall not cause substantial injury to the value of other property in the area in which it is located.

(3) The establishment of the planned development shall not impede the normal and orderly development and improvement of surrounding property.

(4) Adequate utilities, access roads, drainage and/or other necessary facilities have been or are being provided.

(5) Adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets.

(b) Design standards. To supplement and support the general standards of this Planned Development section, all planned developments shall comply with the following design standards:

(1) All Planned developments shall be subject to the applicable regulations governing required project improvements (as defined in Appendix B of the Palatine Code of Ordinances entitled Subdivision, Site Development, and Floodplain Regulations) or within the approved Planned Development...
Development Ordinance, including the dedication of park lands and school sites or for payment of fees in lieu thereof, for residential projects.

a. Where deviations from the applicable requirements are desired, such deviations shall be requested in writing, as a component of the appropriate application submission to the Village and will be reviewed in conjunction with that application process.

b. The owner or developer shall install all required Public Improvements, including but not limited to sanitary and storm sewers, water supply facilities, stormwater detention area, public utilities, and those Project Improvements as required by the applicable Planned Development Ordinance or as required by the Subdivision, Site Development, and Floodplain Regulations.

All excavation, movement of earth, site development and execution of an erosion and sedimentation control plan shall be subject to the rules and regulations of the erosion and sedimentation control measures found in the Subdivision, Site Development, and Floodplain Regulations.

(4) Impact on public facilities and services. The proposed Planned Development shall not impose an undue burden on public facilities and services.

(5) Distance between principal structures. The minimum distance between principal structures shall either be thirty (30) feet or other such distance adopted within the applicable Planned Development Ordinance. However, as the height of the proposed structure increases, a greater distance may be required if necessary, to insure safe access, light and circulation of air.

(6) Traffic circulation.

a. External traffic circulation system. The proposed planned development shall be accessible from public roads and so located with regard to major thoroughfares and uses outside the proposed development that traffic congestion will be minimized and uses adjacent to such thoroughfares will not be adversely affected.

b. Internal traffic circulation system. All streets and driveways constructed within the proposed planned development, whether public or private, shall be adequate to serve the needs of the community and shall meet the minimum standards of the Subdivision, Site Development, and Floodplain Regulations and all other applicable ordinances and Village Codes.

c. Vehicular access points. Principal vehicular access points shall be designed to promote smooth traffic flow with controlled turning movements and minimum hazards to vehicular, bicycle and or pedestrian traffic. Minor streets within the proposed planned development shall not be connected to streets outside the development in such a way as to encourage their use by through traffic.

(7) Pedestrian circulation system. The pedestrian circulation system and its related walkways shall be insulated as completely and as reasonably as is possible from the vehicle street system in order to provide separation of vehicular, pedestrian, and, where appropriate, bicycle traffic movement.

(8) Open space. The proposed planned development shall attempt to preserve as much open space as possible. Existing trees, waterways, scenic points, and other community assets must be considered when planning for open space and preserved wherever possible.
(9) Parking. The proposed planned development shall conform to all parking regulations in this ordinance, unless evidence is presented to justify deviation from said regulations.

(10) Dumpster enclosures. The location and area of all dumpster enclosures shall be designated on the plans for all planned developments and located and screened in compliance with the applicable Codes and Ordinances, except as may be provided in the approved Planned Development.

(11) Guidelines. In order to assist the Village in evaluating the merits and appropriateness of applications for planned developments in the Village, the Planning and Zoning Department shall prepare and coordinate the recommended guidelines, based upon the input from the other Village Departments.

a. Unless these guidelines are included as a condition within the Planned Development ordinance, said guidelines shall not be binding but shall be designed and intended to illustrate the types of amenities, standards and conditions which shall be given weight and consideration by the Village Council in determining whether to approve or disapprove a Planned Development.

b. Said guidelines, and all amendments thereto, shall be presented by the Planning and Zoning Department and then to the Plan Commission, which shall review the same and make any changes deemed appropriate.

c. Thereafter, the guidelines shall be submitted to the Village Council for the review and consideration.

d. The guidelines shall become effective upon approval by the Village Council, and shall be on file in the Planning and Zoning Department.

c. That the variation, if granted, will not alter the essential character of the locality.
d. Additionally, variations of the floodplain regulations must comply with the standards listed in the Subdivision regulations section 6.08(f). However, no variation may be granted to any development located in the regulatory floodway.

(Ord.No. O-83-96, 5/29/96 §4)

(2) For the purposes of supplementing the above standards, the Village Council, Zoning Board of Appeals, or Administrator may take into consideration the extent to which the following facts favorable to the applicant have been established by the evidence:

a. That the particular physical surroundings, shape, or topographical conditions of the specific property involved would bring a hardship upon the owner, as distinguished from a mere inconvenience, if the strict letter of the regulation were to be carried out;
b. That the conditions upon which the petition for variation is based would not be applicable generally to other property within the same zoning classification;
c. That the purpose of the variation is not based exclusively upon a desire to make more money out of the property;
d. That the alleged difficulty or hardship has not been created by any person presently having an interest in the property;
e. That the granting of the variation will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located; or
f. That the proposed variation will not impair an adequate supply of light and air to adjacent property, or substantially increase the danger of fire or otherwise endanger
the public safety, or substantially diminish or impair property values within the neighborhood.

(3) Administrative Variations adhering to the application submittal requirements and Ordinance limitations may be administratively approved as follows:

a. After the administrative variation application is submitted and reviewed by the various Village Departments, the Village will indicate if the applicant may proceed forward with seeking approval of the requested relief, as follows:

i. Upon review and confirmation of a submitted application to the Village, the applicant reviews the requested relief and all associated proposed plans with the required adjacent property owners. As part of this review, the applicant must obtain and submit a signed statement, on a Village provided form, along with a set of the proposed plans, confirming that those property owners have no objection to the requested administrative variation. Only upon receiving a signed statement along with a signed set of plans from each required property owner, may the administrative variation be recommended for approval. If an administrative variation is not granted, the applicant may file for standard variation.

ii. In conjunction with the submitted approval from all of the required adjacent property owner, the Village will send a copy of the administrative variation application by standard mail to all taxpayers of record and occupants within 250 feet of the boundaries of the subject property. If there are no written objections filed with the Department of Planning and Zoning within 10 days of receipt of such notice, the administrative variation may be granted. The Village Council, upon report of the Zoning Board of Appeals and without further public hearing, may grant any proposed variation or may refer it back to the Zoning Board of Appeals for further consideration, and any proposed variation which fails to receive the approval of the Zoning Board of Appeals shall not be passed except by the favorable vote of two-thirds (2/3) of all members of the village board. Variations from the provisions of this ordinance shall be granted only by the Village Council. Upon receipt of report and recommendation from the Zoning Board of Appeals the Village Council may:

(4) Stay of Proceedings. An appeal stays all official proceedings unless the officer from whom the appeal is taken provides the Zoning Board of Appeals with a statement stating that a stay of the proceedings would cause imminent peril to life or property.

(5) Decision of the Zoning Board of Appeals. The Zoning Board of Appeals shall reach its decision within thirty (30) days from the date of the public hearing on the appeal. The concurring vote of five (5) members of the Zoning Board of Appeals shall be necessary to reverse any order, requirement, decision or determination of the Officer. The Zoning Board of Appeals shall maintain complete records of all appeal actions. Decisions shall be submitted to the applicant and Officer.

(6) Appeals to Courts. (a) Purpose and authorization. Except as provided in paragraph (b) of this Section, Special Uses and Special use amendments shall be heard by either the Zoning Board of Appeals or the Plan Commission. The development and execution of this ordinance is based upon the division of the Village into districts, within any which district the use of land and buildings, and the bulk and location of buildings and structures as related to the land are substantially uniform. (Ord. #0-171-94 ±2 and ±3, 11-14-94; Ord. #0-122-10, §2, 10/4/10)

(1) It is recognized, however, that there are special uses which, because of their unique characteristics cannot be properly classified in any particular district or districts without consideration, in each individual case, of the impact of those special uses upon neighboring land and upon the public need for the particular special use at the particular location.

(2) While specific regulations for specific zoning districts in this ordinance may recognize particular uses that may be allowable in such zoning district as a special use, all such special uses fall, nevertheless, into two (2) broad categories:

   a. Uses publicly operated or traditionally affected with the public interest; and
   b. Uses entirely private in character, but of such an unusual nature that the operation may give rise to unique problems with respect to their impact upon neighboring property or public facilities. Such uses may include planned unit developments meeting the standards and requirements of this ordinance.

(b) Administrative Special Uses, Minor Special Uses, and Special Use Amendments. All applications for administrative special uses shall be made on an appropriate application form provided by the Village. (Ord. #0-122-10, §3, 10/4/10)

(1) The Village Manager or designee may recommend approval of the following applications for Minor Special Uses, Administrative Special Use, and Special Use Amendments to the Village Council on the Consent Agenda, or may remand the application to the Zoning Board of Appeals for further action. Minor Special Uses which comply with the application and ordinance may be administratively approved, pursuant to the required process in the following category: (Ord. #0-122-10, §4, 10/4/10; Ord. O-36-17, 4/3/17)

   a. Applications for special uses involving sheds encroaching upon the setback requirements. (Ord. No. O-83-96, 5/29/96 ±6; Ord.No.0-188-99,32, ±11-8-99)
   b. Changes to existing Special Uses which maintain substantial conformance to the enabled Special Use. (Ord. #0-122-10, §5, 10/4/10)

(2) Administrative Special Uses – The Village Manager or his designee shall consider the following Administrative Special Uses and may recommend approval to the Village Council on the Consent Agenda or may remand the application to the Zoning Board of Appeals. Residential structures constructed and approved by the Village of Palatine for Final Occupancy as of January 1, 2017 are eligible to apply for this relief. Residential structures not meeting this eligibility date shall follow the standard Special Use process. Any administrative special use involving a residential building or structure addition shall be recommended for approval on the Village Council Consent Agenda. The following types of relief are eligible for administrative special uses:

   a. Residential setback reductions for all yards, for which the proposed setback shall not exceed the minimum requirement by more than 10%, within each zoning district.
(For example, if the required front yard is 30 feet, an administrative special use could be applied for, provided that the proposed setback was at least 27 feet).

b. Residential fencing, which requires Special Use review.
c. Replacement of existing accessory structures, with non-conforming setbacks, which maintain or increase the existing setbacks and are within 10% of the total square footage of the existing accessory structure. Accessory structures located in the front yard or side yard abutting a street are not eligible for this type of relief.

(c) Application for Administrative Special Uses, Special Use and Special Use Amendments. The application for Special Use, Special Use Amendments, and Administrative Special Uses shall be filed and processed in the manner prescribed for applications for amendments and shall be accompanied by the following information: (Ord. #0-122-10, §6, 10/4/10; Ord. O-36-17, 4/3/17)

1. Said application shall contain the following information:
   a. Petition for Hearing;
   b. Real Estate Interest Disclosure Form;
   c. Site Plan, Elevation, Plat of Survey and legal description of the subject property; and
   d. Proof of ownership, including signature(s) of owner(s) on the petition for hearing or on a statement attached to said form giving owner’s consent of the petition.

2. The following materials may be required by the Village, either as part of the application or as a condition of approval.
   a. Site plan;
   b. Floor plans;
   c. Building elevations;
   d. Preliminary Engineering Plans;
   e. Business plan;
   f. Signage information;
   g. Traffic analysis; and
   h. Any other information deemed necessary by the Village. (Ord. 0-60-06, §19, 4/3/06)

(d) Standards. No special use shall be granted by the Village Council unless the special use or special use amendment: (Ord. #0-122-10, §7, 10/4/10)

(1) Is deemed necessary for the public convenience at that location if categorized as (2)(a) by paragraph (a) above.

(2) Is so designed, located, and proposed to be operated that the public health, safety and welfare will be protected.

(3) Will not cause substantial injury to the value of other property in the neighborhood in which it is located.
(4) With respect to requests for live entertainment, the following additional standards must be met. Said live entertainment: (Ord. No. 0-3-10, §2, 1/11/10)

a. Shall not produce noise levels so great as to constitute an unreasonable interference with the rights or wellbeing of persons outside of the confines of such establishment.
b. Shall not impose undue health, sanitation or safety burdens on the village.
c. Shall not create excessive demands on the police department of the village so as to impair its ability to maintain the peace in the village and provide adequate protection for its citizens.
d. Shall not be of a nature otherwise prohibited by law or village ordinance.

The entertainment proposed shall be fully described in the ordinance granting any special use hereunder and shall be subject to such reasonable conditions as the president and board of trustees may prescribe. Any change from the stated entertainment shall require another special use or permit.

(5) With respect to front yard fencing and fencing in a rear yard/side yard abutting a street, the following additional standards must be met:

a. Will meet the following aesthetic criteria:
   i. Will not destroy existing vistas in the area;
   ii. Will enhance the appearance of the homes and the streets in the area; and
   iii. Will not detract from the overall appearance of the community; or
b. The fencing is found to be necessary to protect private property or the safety of the inhabitants of the property.

(6) After the administrative special use application is submitted and reviewed by the various Village Departments, the Village will indicate if the applicant may proceed forward with seeking approval of the requested relief, as follows:

a. Upon review and confirmation of a submitted application to the Village, the applicant reviews the administrative special use application and all associated plans, with the required adjacent property owners. As part of this review, the applicant must obtain and submit a signed statement, on a Village provided form, along with a set of the proposed plans, confirming that those property owners have no objection to the requested administrative special use. Only upon receiving a signed statement along with a signed set of plans from each required property owner, may the administrative special use be recommended for approval. If an administrative special use is not granted, the applicant may file for a standard special use.

b. In conjunction with the submitted approval from all of the required adjacent property owners, the Village will send a copy of the administrative special use application and plans by standard mail to all taxpayers of record and occupants within 250 feet of the boundaries of the subject property. If there are no written objections filed with the Department of Planning and Zoning within 10 days of receipt of such notice, the administrative Special Use may be granted. If an administrative special use is not granted, the applicant may file for a standard special use.

(Ord. O-36-17, 4-3-17)

(e) Conditions. The Plan Commission and the Zoning Board of Appeals may recommend, and the Village Council may provide, such conditions and restrictions upon the construction, location and operation of a special use, including but not limited to provisions for off-street parking and loading, as may be deemed necessary to promote the general objectives of this ordinance and to minimize injury to the value of property in the neighborhood.

(f) Lapse of special use permit. A special use permit hereunder granted shall lapse if:

(1) A building permit has not been issued by the village for such construction, installation, or relocation within one year after the effective date of the ordinance granting said special use.
(2) A building permit has been issued, but such construction, installation or relocation is not completed within two (2) years after its issuance.

In the event a special use lapses, nothing herein shall prohibit any person from applying for the same special use or a new special use on substantially the same terms.

(g) Enforcement, penalties and termination.

(1) The Corporate Authorities of the Village may enforce any of the conditions upon which a special use has been granted hereunder or one or more of the standards set forth in subparagraph (d) herein by instituting an appropriate action in the Circuit Court of Cook County, Illinois to enjoin the violation of such condition, and in addition may institute an action in said court to impose appropriate fines for such violations.

(2) The Corporate Authorities of the Village may terminate any special use for violation of a condition upon which such special use has been granted or one or more of the standards set forth in subparagraph (d) herein in the following manner:

a. Written notice of the alleged violation shall be served either personally or by registered or certified mail, upon the owner and upon the occupant, if any, of the premises covered by such special use, allowing thirty (30) days following personal service or mailing of said notice for the violation to be cured, and setting a date certain sometime after said thirty-day period for a public hearing thereon before the Corporate Authorities of the Village.

b. If the alleged violation is cured within the thirty-day period and the village manager so certifies, the public hearing shall be cancelled.

c. If the village manager does not certify, the public hearing shall be held and the owner and occupant, if any, given an opportunity to show cause, if any thereby, why the special use should not be terminated.

d. At the conclusion of the hearing, the Corporate Authorities may:

i. Permit the special use to continue generally;

ii. Permit the special use to continue allowing such additional time to cure the alleged violation as they deem warranted under the circumstances;

iii. With the consent of the owner, adopt an ordinance modifying the special use in such manner as they deem appropriate after due notice and public hearing as required by this section; or

iv. Adopt an ordinance repealing the special use, provided that any such ordinance shall contain findings of fact upon which such repeal is based.

(3) All remedies and actions provided in this paragraph (g) shall be in addition to and not in place of those elsewhere provided in this ordinance or available under the laws or statutes of the State of Illinois; specifically including Article XIII, which applies to planned developments.

(h) Transfers of Special Uses

(1) In order to transfer an existing Special Use within the Village of Palatine, a Special Use transfer request shall be submitted to the Department of Planning and Zoning. The transfer shall apply if there is an ownership change for any new owner, operator, lessee, or changes to the corporate structure for a given use operating under a specific Special Use ordinance. The Special Use transfer requirement shall not apply to single-family properties used only for single-family residential purposes.
(2) The Special Use transfer request will indicate that the specific Special Use Ordinance was reviewed and that the proposed new owner/operator will comply with both the Special Use Ordinance and any related conditions therein upon transfer and continue operating the Special Use in a manner consistent with operative Special Use.

(3) Once the Village receives and reviews the Special Use transfer request, the Village Manager will schedule the transfer for Village Council review and either:

   a. Place the transfer request on the Village Council agenda, for those requests generally consistent with the underlying Special Use.

   b. If the Village Manager deems that the new proprietor contemplates a change in use which is inconsistent with the Special Use ordinance, the new proprietor shall be required to Petition for a public hearing before the Zoning Board of Appeals for a new Special Use.

(Ord. No.0-69-10, §1, 6/21/10)

(i) Special Use Amendments

(1) It is recognized that existing Special Uses will contemplate building and site additions, floor plan changes and operational adjustments that may change the underlying approvals granted in the original Special Use.

(2) If a proposed amendment to a Special Use does not substantially conform with the enabled Special Use, a Special Use Amendment will be processed as a new Special Use under Section 14.05 of the Village’s Zoning Ordinance. If a proposed change does substantially conform with the enabled Special Use, then the Special Use Amendment may be processed Section 14.05(b)(1). Such conformance or lack thereof shall be determined by the Administrator after reviewing the proposed changes.

(Ord. #0-122-10, §8, 10/4/10)

14.06. Amendments.

(a) The plan commission shall hold public hearings on all proposed zoning amendments to this ordinance, except in connection with annexation of property involving existing development or pending application before Cook County for proposed development, in which case the president and board of trustees shall hold such hearing. The plan commission shall report its findings and recommendation to the village board.

(b) No request for amendment to this ordinance shall be acted upon, unless it is accompanied by such fee as may be prescribed by the board of trustees to defray the cost of publication and other expenses incident to the considering and enacting such amendment, excepting upon direction of the board of trustees.

14.07. Required permits and certificates.

(a) Building permits.

(1) It shall be unlawful to start the construction of a new building, structure, parking lot or sign, or the enlargement, alteration or removal of a building or structure which involves a change in use without first filing written application for and obtaining a building, development, or removal permit from the administrator.

(2) Each application for a building permit shall be accompanied by a plat in duplicate, or duplicate prints thereof, drawn to scale, showing the actual dimensions of the lot to be built upon, the size, shape and location of any existing building, and such other information as may
be necessary to provide for the enforcement of this ordinance. A record of applications and plats shall be kept in the office of the administrator.

(3) No building, development, removal or erection permit shall be issued unless the administrator has certified after examination of the plot plan and construction plans that such plans show compliance with all provisions of this ordinance.

(2) Certificate for occupancy of a building shall be applied for coincident with the application for building permit and shall be issued within ten (10) days after the erection or alteration of such building has been completed. A record of all certificates shall be kept on file in the office of the village manager and shall be furnished, on request, to any person having proprietary or tenancy interest in the building affected.

No permit for excavation for, or the erection of, any building shall be issued before application has been made for certificate of occupancy and compliance. No building or premises may be occupied until such certificate shall have been issued.

14.08 Withdrawal of Application and Repeated Application.

(a) Withdrawal of Application: A Petitioner may withdraw an application at any time prior to a final decision being rendered by the Village Council. Such withdrawal shall not prohibit the Petitioner from being able to refile such application, but any such refiling shall be treated as an entirely new filing and shall be subject to all applicable procedures and fees within the Village Code in the same manner as any other new application.

(b) Repeated Application: Where an application for an amendment, special use, or variation has been filed by or on behalf of the owner or owners of property affected, no subsequent application requesting substantially the same relief, as determined by the Village Manager, shall be filed as to the same property within a period of one (1) year following final action by the Village Council.
